

State of Nevada Renewable Energy and Energy Efficiency Authority  
Stakeholder Meeting Evaluation Summary  
November 22, 2010

**What are your top three concerns about adoption, implementation and/or compliance with the proposed 2009 IECC energy codes?**

Southern Nevada Jurisdictions and industry have worked very hard to review and adopt the 2009 IECC with local amendments. We would hope that state adoption does affect or substantially alter our local amendments. Need to review info first.

Application of code by builders, inspection agencies, inspectors and plan examiners  
Lighting for casino, theme, amusement parks

Does chapter 5 of the 2009 IECC meet the state mandate of, "A building energy code for commercial buildings throughout the state that meets or exceeds Ashrae 90.1, or achieves equivalent or greater energy savings."

Training staff to the new code.

Will the state accept 501

Any amendments to the IECC are reasonable and enforceable; number of amendments are kept to a minimum to increase enforceability and reduce confusion. Clarify that REEEA approval will not required for permit (job) specific alternate materials and methods approvals granted by the local building officials (which number 100s in a given year).

Local jurisdiction need clear ability per 10L to accept appropriate alternatives

**Please provide us with suggestions to enhance future meetings, including other topics of interest related to the proposed 2009 IECC energy codes.**

Have specific training for residential and commercial.

**Please circle other energy code topics of interest:**

	<u>Count</u>
a. residential requirements	5
b. commercial requirements	5
c. lighting	4
d. daylighting	3
e. HVAC	5
f. ASHRAE 90.1-2007	4
g. REScheck	4
h. COMcheck	3
