Nevada State Office of Energy

Dear Office of Energy,

Adopting the current International Energy Conservation Codes will help use our power more efficiently, and reduce our dependence on costly and dangerous fossil fuels.

By improving building codes, we can reduce harmful emissions that deteriorate lung health while also contributing to global warming. By using energy more efficiently, we can save ratepayers money. Please support adopting the current International Energy Conservation Codes.

Over the years since the 2006 IECC was first adopted, Nevada has come a long way and has been a leader in energy efficiency for new buildings. It is time to continue improving that path toward increasing energy efficiency.

Sincerely,

Ms. Rita Ransom
