

Energy Code Education

Pursuant to NRS.701.220, the Governor's Office of Energy (GOE) is beginning the process to adopt the 2015 International Energy Conservation Code (IECC) by July 1st, 2018.

These *free* half-day sessions will provide a comprehensive review of both the commercial and residential provisions of the 2015 International Energy Conservation Code (IECC), highlighting the difference between the 2012 IECC and 2015 provisions. Differences between 2015 IECC and 2009 IECC may also be included as appropriate. Changes include, but are not limited to: scope and application, building envelope, mechanical and electrical power and lighting.

**To register simply utilize the link provided for each session.
You must register for each free session *separately* on Eventbrite.**

DATE: Tuesday, June 27th
LOCATION: The Innovation Center, 2nd Floor
450 Sinclair St, Reno, NV 89501
TIME: 8:00am to Noon: **Commercial** Provisions <http://bit.ly/2oYPxJ1>
1:00pm to 5:00pm: **Residential** Provisions <http://bit.ly/2pYN2rc>
DEADLINE: Space is limited, so please register by June 23rd.

Light morning and afternoon refreshments will be provided

MEET YOUR INSTRUCTOR: Eric Makela, Senior Associate, is the team lead for the Codes and Standards team at Cadmus Group. Eric's building energy codes expertise spans 30 years, numerous states, and countries as diverse as Abu Dhabi, Bahrain, Fiji, and India. Makela has served on the IECC Code Development Committee for four cycles, and now represents the Northwest Energy Codes Group in developing IECC code change proposals.

Additional Benefits to Attending:

- Understanding the value of building to the energy code
- Insight into inspection and plan review points
- What's required on the plans for the energy code
- Participating and learning from a variety of building industry professionals
- Insight into construction and installation practices of the 2015 IECC
