

TAKE CHARGE NEVADA

Are you interested in driving more customers to your business and community?

The Governor's Office of Energy and NV Energy are seeking to partner with one business or government entity in your community to host a charging station for electric vehicle drivers in Nevada. We are looking to jointly invest in an off-street location that can accommodate one fast-charge port and two level-2 charging hookups for Nevada's growing electric vehicle market.

DO YOU QUALIFY?

- Are you located along U.S. Route 95, between Reno and Las Vegas?
- Would your location have 24-hour access?

Please visit nvenergy.com/EV to access the Nevada Electric Highway Charging Station Application to see if your business or entity qualifies.

For more information about NV Energy's electric vehicle programs, visit nvenergy.com/EV.
