

# FACT SHEET

MARCH 2015

Nevada Governor's  
Office of Energy

## Performance Contract Audit Assistance Program (PCAAP)

Energy conservation is important to the Governor's Office of Energy (GOE) as a cost-effective way to reduce energy consumption while reducing costs to building owners. Building on this principle, GOE develops programs that yield the highest payback that best serve the residents of Nevada. In March 2014, the GOE created and launched the Performance Contract Audit Assistance Program (PCAAP) that provides no-cost assistance for investment grade audits for eligible Nevada government entities.

- **Upgrade Government Buildings:** Performance contracting offers a tremendous opportunity to not only manage energy budgets but to upgrade and modernize government facilities.
- **Financial Benefits:** Reduced taxpayer burden of growing government energy budgets, incorporation of renewable energy, and job creation right here in Nevada.
- **Improved Health:** Investments in energy efficiency can create a healthier work environment, which results in more efficient and productive government employees.
- **Quality Assurance:** All contractors performing energy upgrades are Building Performance Institute (BPI) certified and licensed by the State of Nevada.
- **Nevada Jobs and Nevada Materials:** To date, it is estimated that more than 250 jobs may be created, more than \$5 million of Nevada produced materials utilized, and an annual reduction of nearly 7 million kWh.
