**Subject:** Workshop Comments

Robin,

I attended and spoke at the December 13<sup>th</sup> IECC workshop and was asked to submit my written comments. I apologize for the delay, and hope you are the appropriate person. Please see my below comments:

*SNHBA supports regulations that give the GOE, stakeholders and the public more structure. In past years, there has not been a regular, uniform process for the Office to review, amend, and adopt the IECC.*

*Our Association hopes that this body would consider adding a step to the proposed process: in Section 1, after a finding of suitability, that a review be conducted to determine what amendments to the Code will be needed to comply with state law.*

*SNHBA believes that amending the Code prior to adoption based on these amendments will result in a code more compatible with the build environment in our state and the resulting Code will be a superior guideline for jurisdictions looking to state code as a model.*

Thank you. Please let me know if you have any questions/concerns.

Respectfully,

Amanda Moss
