

New Table R406.4.1**Table 406.4.1**

Energy Rating Index or equivalent	% Credit for On-Site Power Production**	with 50% kw battery storage***	with 100% battery storage****
78 and above*	0	0	50
77	5	50	100
76	10	50	100
75	15	50	100
74	20	50	100
73	25	50	100
72	30	50	100
71	35	50	100
70	40	50	100
69	45	50	100
68	50	55	100
67	55	60	100
66	60	65	100
65	65	70	100
64	70	75	100
63	75	80	100
62	80	85	100
61	85	90	100
60	90	95	100
59	95	100	100
58 and below	100	100	100

Note: This table is for calculation of impact of onsite power producing on ERI score and does not change the ERI score required by code. The performance required by IECC Section 406 will continue to become more efficient over code cycles . The "net" score will need to meet or exceed the performance mandated by Section 406.

*Performace of 2009 IECC home

**% of power produced on-site applied per ERI value or equivalent

*** 4 kw system with 2kw battery storage

****4kw system with 4kw+ battery storage
