Please respond to each question. Answers to the questions will assist Department of Taxation staff in determining whether the facility should be locally or centrally assessed. Other questions will assist staff in understanding whether the reported replacement costs capture all aspects of taxable value.

1) Will you have a possessory interest in any governmentally owned property for this facility? Please describe if yes.

No.

2) Will the facility, including generation, transmission, or distribution cross state or county boundaries? If yes, please describe.

No.

3) Is the facility owned by a subsidiary of a company that is interstate or intercounty in nature? Name and location of the subsidiary company, if yes.

Nevada Gold Energy LLC (the "Applicant") is a wholly-owned subsidiary of Nevada Gold Mines LLC ("NGM"), which is in turn a joint venture between Barrick Gold Corporation, a British Columbia Corporation, and Newmont corporation, a Delaware corporation.

4) At what physical point is the ownership of energy transferred? Describe the location and nature of the connection to the transmission grid.

Ownership of energy will be transferred at the Point of Interconnection at the 120 kV side of the Falcon Substation, which is owned by Sierra Pacific Power Company d/b/a NV Energy and located approximately 6 miles from the Facility.

5) Will the facility be eligible for other abatements or exemptions such as pollution control exemptions? Please describe if yes

No.

6) Has your company applied and/or been approved for any abatements or exemptions for this facility or any other facility by the State of Nevada and/or local governments? If yes, list the abatements awarded, name and location of the project, name of the awardee, date of approval, amounts and status of the accounts.

Yes- This facility has received a RETA abatement, this application serves to amend it for the full 200MW build out rather than the initial 100MW as described in the previous application.

7) Has your company applied for, or planning to apply for, an exempt wholesale generator designation as defined in 15 U.S.C 79z-5A?

No.

8) If an EIS or EA has been performed, please supply the ROD number.

An Environmental Statement ("ES") was prepared in April 2020 and submitted with the Application for a Permit to Construct pursuant to the Utility Environmental Protection Act. The Facility is not subject to the National Environmental Policy Act as no portion of the Facility is located on federal lands, therefore, there is no ROD associated with the EA that was performed.

9) Has an appraisal been performed on any portion of this land or project?

No.

10) Has a Power Purchase Agreement been executed?

NGE and NGM have executed a Memorandum of Understanding pursuant to which NGE will supply, and NGM will purchase, all electricity and portfolio energy credits produced by the Facility for use by NGM's mine sites and associated facilities.
